OBJECTIVE

- Power Platform Developer with one year of experience building business apps using Power Apps, Power Automate, Power Pages, Power BI, SharePoint, and Dataverse. Skilled in creating high-quality Canvas Apps, automated workflows, and efficient data models that streamline processes and reduce manual effort.

EXPERIENCE

Cetas Information Technology - Chennai

Jan 2025 – Present

Power Platform Developer

- Built and maintained Canvas Apps and Model-Driven Apps with Dataverse and Sharepoint, optimized formulas, and secure role-based access.
- Designed and automated workflows using Power Automate, including approval processes, notifications, and system integrations.
- Developed and customized Power Pages and worked on Sharepoint framework that can be embedded and used directly within SharePoint sites.
- Created Power BI reports and dashboards to support business analytics and improve decision-making.

PROJECTS

Travel Management - Canvas Application

Technologies: Canvas App , Power Automate, Power Pages, Dataverse, SAP SF, Business Central

- Developed a Canvas Application for creating and managing travel requests, integrated with SAP SF, Business Central, and Power Pages.
- Automated workflows and notifications using Power Automate, reducing manual intervention.
- Used Dataverse as the backend data source for storing travel requests and related details.

Purchase Offer Application

Technologies: Canvas App, Model-Driven App, Power Automate, Dataverse

- Built an application where the purchase team can create purchase offers and the sales team can create sales options in Dataverse.
- Implemented role-based access for purchase, sales and Admin users to manage master data using model driven application.
- Automated workflows and notifications using Power Automate to streamline business processes.

IT Service Desk Management

Technologies: Canvas App , Power Automate, SharePoint, SharePoint Framework

- Developed a ticketing system where users can raise tickets and track progress, and engineers/admins can assign and manage tickets.
- Implemented role-based access for Users, Engineers, and Admins.
- Automated notifications and business processes using Power Automate.
- Built a SharePoint app using SharePoint Framework to create a custom SharePoint UI Concealer.

TECHNICAL SKILLS

- **Power Platform:** Power Apps,Power Automate,Power BI,Power Pages,Dataverse,Copilot Studio,Dataflows,Custom connector,Power FX,PCF,AI Builder,Security Roles.
- **Technologies/Tools:** Git,Github,Sharepoint,Power Platform Admin Center.
- **Programming Languages:** Java,C,Javascript,HTML/CSS.

CERTIFICATIONS

PL-900: Microsoft Power Platform Fundamentals (April 2025)

- **Institution:** Microsoft
- **Description:** Demonstrated foundational knowledge of Power Apps, Power Automate, Power BI, Power Pages, and Dataverse, including the ability to analyze business requirements and leverage Power Platform components to build low-code solutions.

ARTIFICIAL INTELLIGENCE COURSE (July 2023)

- **Institution:** IBM
- **course description:** Seamlessly collaborated, applied machine learning techniques, and contributed substantively to innovative AI solutions in a cross-functional team, emphasizing adaptability and effective communication.
